Waiting doesn't pay. If you neglect the aching back, Urinary troubles, diabetes, surely follow.

Doan's Kidney Pills relieve backache. Cure every kidney ill.

S. H. Maxwell, barber, at 303 North Main street, Barre, Vt., says: "My occupation, of course, requires a good deal of standing and stooping over and I suppose this is what brought on kidney trouble in my case. I had a heavy dull pain nearly all the time just over the hips, and at night when I got through working my back would be so lame that I could hardly get around. A friend advised me to try Doan's Kidney Pills and I got them at E. A. Brown's drug store. Before I had used one box I could see they were helping me and after taking three boxes I was completely cured of all my former troubles. I give all the credit for this to Doan's Kidney Pills and always speak a good word for them whenever I have a chance."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

The Charming Woman

is not necessarily one of perfect form and features. Many a plain woman who could never serve as an artist's model, possesses those rare qualities that all the world admires: neatness, clear eyes, clean smooth skin and that sprightliness of step and action that accompany good health. A physically weak woman is never attractive, not even to herself. Electric Bitters restore weak women, give strong nerves, bright eyes, smooth, velvety skin, beautiful complexion. Guaranteed at Rickers & Wells of the Red Cross Pharmacy, 50c.

Farm, Field and Garden

PACKING VEGETABLES.

Some Kinds of Truck Shipped in the Barrel Basket.

Cucumbers are shipped in the one-third barrel veneer baskets. The cut shows a basket ready for heading up. The cucumbers, as will be seen, are not placed in the basket indiscriminately, but are arranged by hand so as to fit closely and to leave a flat surface on top for the placing of the cover. Of course here, as elsewhere, grading is necessary, and the more uniform

BASKET OF CUCUMBERS.

the package the better the sale. The one-third barrel veneer basket is also used for peas and lima beans. As this sort of truck loses moisture rapidly in shipping, the basket should be well packed and filled before the covers are placed on. There is always more or less shrinkage, and if a basket is not full on being opened it does not find ready sale. Truck of this kind should be placed on sale as soon as possible after leaving the field.

The fruit of the eggplant is a fine vegetable that is rapidly becoming more appreciated and better known on our markets. The fruits, though large, are rather tender and should be carefully handled to preserve their smooth shining surface and deep purple color. They are best handled in the one-third barrel veneer basket, the same size used for cucumbers and early potatoes. Cauliflower can be packed and handled in the same size basket as the eggplant—Maryland Experiment Station.

A Cool Dairy Without Ice.

An ingenious woman has devised a plan for having good, cold milk and butter all summer without ice. It is a homemade dairy, is cheap and easily taken care of and is successful. I will give the plan, and any housewife can have it made with very little work.

Get four pieces of scantling 2 by 4 inches, six feet long, and nail pieces two feet long each way about two and a half feet from the ground and nail pieces of the same at the top. Then board over top and also lay a floor at the bottom. Now put a shelf on each side and cover all around and on top with nice clean bran sacks or burlap. Leave one side open and put loops on it and nails on the side to fasten it.

Put a tub on top and fill it with water and put woolen strips of cloth two and three inches wide in it, so that they feed the water down and keep the sacking wet all the time. The air blowing through the wet sacks keeps everything almost as cool as if it were in a refrigerator, and the butter and milk taste better than if they were shut from the air and will keep fresh much longer in this dairy. An old blanket makes the best feeding strips. Put in enough to have three or four to each side.

This dairy was kept in the yard under a shade tree, but a cool back porch is equally good a place and more convenient. Any one who tries this plan I am sure will be delighted with it.

A Destructive Rodent.

A single rat will consume about two ounces of wheat or corn a day and it destroys far more of the latter than it eats, as, indeed, it does of most other food. The average cost to the country of feeding a rat on grain is about 50 cents a year. If for each cow, horse, sheep and hog on the farms of the United States the farmers support one rat on grain, the toll levied on the cereals by these rodents would reach the enormous total of \$100,000,000 a year. Even granting that half their food is waste material, the tax of feeding rats is still an enormous drain on the profits of agriculture.

Apple Trees on Wet Land.

It is generally known that apple trees are very impatient of wet feet. This can easily be seen in orchards where there are small spots of poorly drained land where the water stands, remarks Country Gentleman. In such spots the trees are always poor, and they usually die out early, leaving these places blank in the orchard. It has been observed that a twisted growth of the apple tree trunk indicates imperfect underdrainage.

What the Horse Says.

Don't trot me up hill, for I have to carry you and the truck and myself too. Try it yourself some time. Run up hill with a big load.

Don't keep my stable very dark, for when I go out into the light my eyes are injured.

Don't say "whoa" unless you mean it.—Farm Journal.

A Good Blacksmith.

A good blacksmith is needed in every rural community. We have many blacksmiths that are mere bunglers. They are the cause of many of the foot troubles of horses.—Kansas Farmer.
